Education

- B.S in Computer Science at NYIT in New York, NY Expected graduation: May 2028
- Vice President of the AI Club

Work History

Software Engineering intern - Hearst Magazines

June 2026 - Present

- Worked in a team of engineers in agile sprints using **Typescript, Javascript, HTML, CSS** and **Next.js** in an **AWS** environment to improve Sign up conversion rates on a company website.
- Developed a full-stack internal analytics platform using **Node.js, React, REST APIs, Docker, GitHub**, and **CI/CD** pipelines to track LLM token usage, improving cost visibility for leadership while receiving detailed mentorship and criticism from the senior developer.

Programming Instructor, Coding Mind Academy, Remote

November 2025 - May 2026

- Taught **Java, Python** and **Generative AI** to students by writing code together using Github and CI/CD pipelines while receiving mentorship advice from senior instructors in the form of assessments and guidance to teach students more efficiently.

Personal Projects

Streamclip – Open source clipping engine for Twitch streamers

- Created an application that automatically clips 4-12 hour long twitch streams and generates viral style short clips using **OpenAI API, Modal, Next.js, React, python** and **PostgreSQL** to help small creators with limited money and time promote their channels on Titkok and shorts.

TutorRev – YouTube Programming Tutorial Review platform

- Built an application using **Java, Springboot, Rest APIs, NoSQL(MongoDB), CI/CD pipelines** and **Github** to create a Tutorial Review Platform that allows beginners to find up to date tutorials reviewed by the community.
