

Saba Karazanashvili

(929) 471-2803|Skarazan@nyit.edu|[LinkedIn](#)|[Git](#)

Education

- B.S in Computer Science at NYIT in New York, NY Expected graduation: May 2028

Work History

Programming Instructor, Coding Mind Academy , Remote November 2025 - Current

- Taught Java, Python, SQL and Generative AI to students by writing code together using Github and CI/CD pipelines while receiving mentorship advice from senior instructors in the form of assessments and guidance to teach students more efficiently.

Personal Projects

***TutorRev** – YouTube Programming Tutorial Review platform February 2026 - March 2026*

- Built an application using Java, Springboot, Rest APIs, NoSQL(MongoDB), CI/CD pipelines and Github to create a Tutorial Review Platform that allows beginners to find up to date tutorials reviewed by the community.
- Developed frontend website with Javascript, HTML, CSS, React, and Docker in a PaaS environment based on AWS to ensure scalability, optimal design and ease of access from any region to attract more users into the community.

Crypto Tax engine – Solana Transaction parser January 2026

- Created a local Rest API with Python and Github that allows users to input their Solana Blockchain address for a yearly CSV report to make Tax calculation easier for my brothers
- Created a simple frontend with HTML/CSS and Anthropic's LLM Claude Opus for easier development
- Parsed through Helius API blockchain information to access token Metadata and calculate transaction history with Realized/Unrealized Gain and Loss using Data structures.
